

Logesta

Our active ingredient is security.

The full comprehensive management your product need.

Guaranteeing any product is transported in perfect conditions is a challenge in itself. Guaranteeing this in the pharmaceutical sector involves a genuine logistical feat, which involves coordinating the technology, protocols, fleet and network to guarantee the security of your product.

The security of a leading group

Logesta was formed in 2002 when Corporación Gestamp and Logista Group joined forces to provide long-haul transport to both groups and to the logistic sector in general.

To do this, we have always sought to optimize transport logistics and satisfy the needs of all agents involved through integrated management and the use of the latest technology.

After a continuous analysis of our clients' requirements, we have refined our services in terms of security, agility and professionalism.

We can now justifiably claim to be among Europe's leading transport companies with regard to active and passive security, driver training, fleet volume and the size of our network.

The security of a company that will take you further

Logesta can provide pharmaceutical manufacturers with all the security they need to transport their products: our satellite tracking systems guarantee, real-time tracking throughout the whole journey.

As members of the Logista Group, we have a vast experience transporting high-value, fragile and pharmaceutical goods, the latter for Logista Pharma, the sector's leading pharmaceutical logistics operator, which also belongs to the Logista Group.

Our human team comprises highly qualified professionals with wide experience in international transport management. They work around the clock every day of the year to serve our clients being able to use any language of the European Union.

One of our objectives is to offer optimal services to specialized sectors. In this sense, our traffic operators and drivers receive ongoing professional training.

If security is essential to your company, consider us as your vault in Europe.

You will also have an integrated, innovative and efficient transport management.

These figures are our endorsement

Managed vehicles: more than 1.600

Loading centres: more than 575

Transport bases: more than 190

Kilometers per year: more than 120.000.000

Tonnes transported: more than 5.000.000

Loads per year: more than 200.000

Security: our advantages.

The comprehensive security Logesta provides to each pharmaceutical consignment involves not only guaranteeing that the product is conserved in perfect condition but also the security of the vehicle itself in case of unforeseen events or attacks, and the routes to be taken. There are more than 1,600 vehicles available to distribute your products throughout Europe using the most advanced security technologies.

Load security

Real-time temperature control:

The ideal temperature range for the medicine will be set for each journey. Any deviation from the range will set off an alarm at our headquarters, which will correct the situation, preventing any incident before they occur.

Vehicle security

To guarantee the safety of your merchandise, drivers and vehicles are all equipped with devices and systems that turn them into genuine vaults:

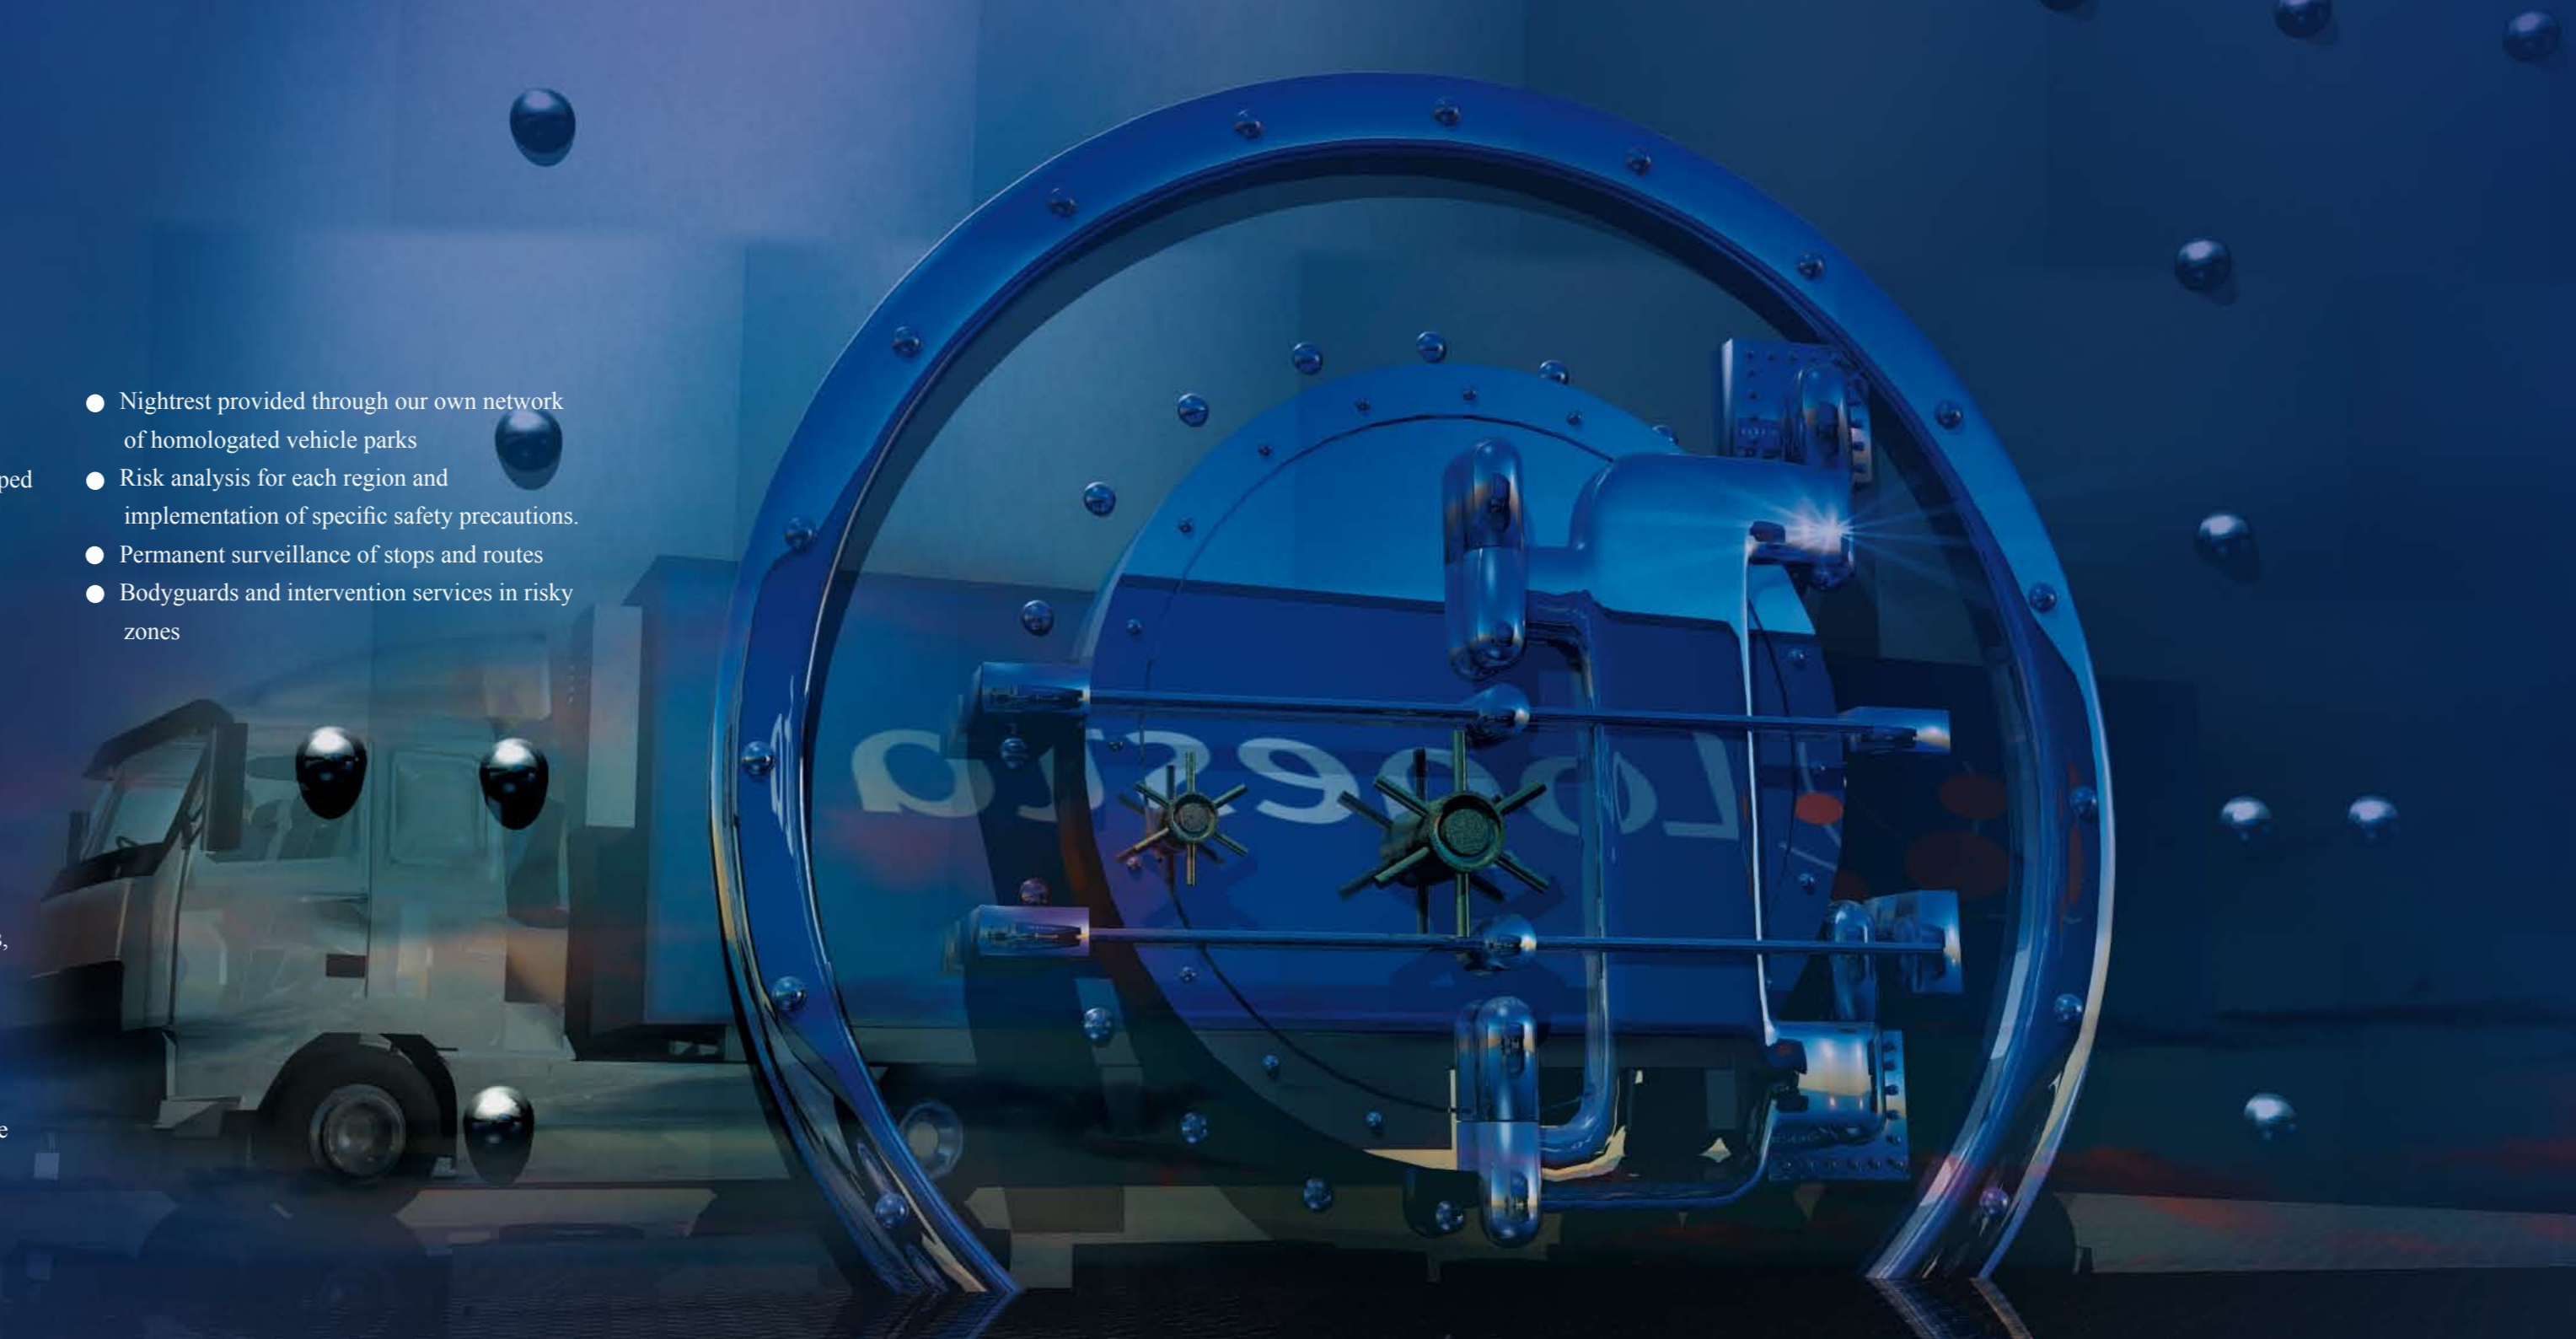

- Every vehicle has GPS connection
- Certified bolts and seals
- Panic buttons
- Displays
- Sensors
- Hidden microphones
- Television cameras

Safety on the road

As well as plotting the routes and stops, these are monitored every 15 minutes and information about the drivers is updated in real time online.

- Connection to the Monitoring Station in Headquarters, which receives alarms, police warnings and provides support in case of accident.

- Nightrest provided through our own network of homologated vehicle parks
- Risk analysis for each region and implementation of specific safety precautions.
- Permanent surveillance of stops and routes
- Bodyguards and intervention services in risky zones

The network : our key point.

Your european network

Logesta has its own offices in Spain, Portugal, Germany, France, Italy, Holland, Poland and Morocco.

Our policy of working alongside our clients has led us to establish new bases in the emerging markets over recent years.

Similarly, and in line with this strategy, we work in close collaboration with logistics partners in the air, railway and sea freight sectors to guarantee our clients the best routes or timings for their products.

This philosophy has helped us to win the confidence of leading brands in high value goods, such as consumer electronics products, tobacco and pharmaceutical companies throughout Europe.

Some of our main clients:

- Philip Morris
- British American Tobacco
- Altadis
- Grundig
- Grupo Alter
- Sharp
- Glaxo Smith Kline
- Nestlé

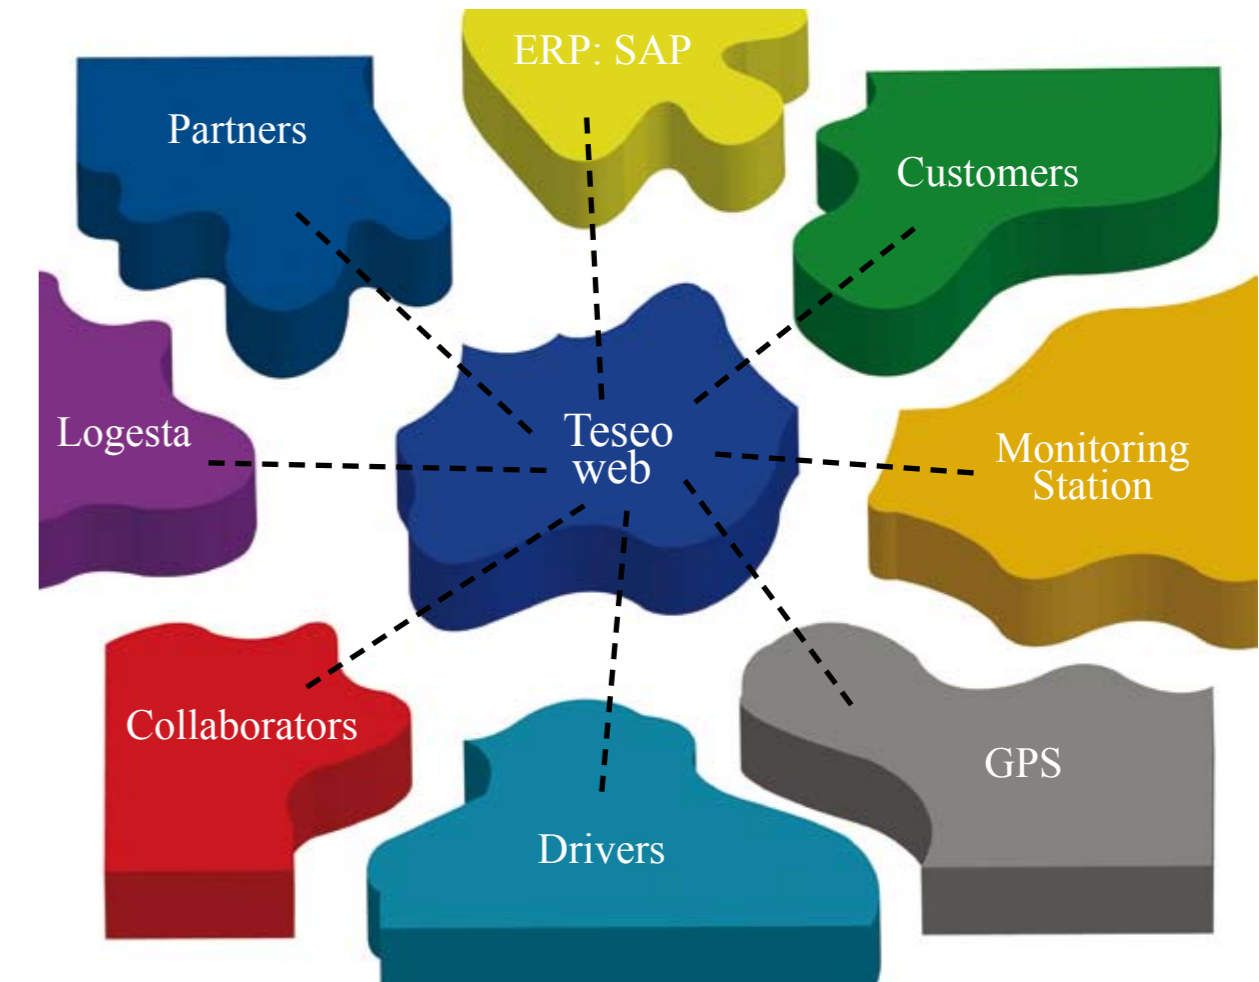

Your Technology network

This security, quality and logistical efficiency is possible as a result of our investment in state-of-the-art technology that enables the integrating of all the agents involved in the transport chain according to their constraints. This is TeseoWeb, an application that means we can offer you:

- 365x24 control of all the requirements and coming from every delivery
- GPS tracking of the actual position of each trailer, every 15 minutes
- Permanent connection to the Headquarters Monitoring Station
- Forecasting any delay or incident to guarantee deadlines and service quality
- Flexibility when planning and raising solutions
- Real time information for clients
- Generating personalised management reports for each client

In short, total traceability throughout the complete journey. If you want your product to stay as safe as it is in your plant, we are your European network.
